Note: these kilns are supplied as standard without energy regulators but we can add these for £35 each.

The whole kiln can be controlled by one regulator, or each zone by a separate regulator (ie 2 for the 2.6cu.ft and 4.3cf kilns, 3 for the others). This facilitates the use of the kiln without a controller, with added zone control.

The "KilnOnly" price excludes thermocouple, regulators and instrumentation.

Instrumentation: The Hobbymaster 4 stores 9 user-defined programs each with up to 8 segments, each comprising ramp-hold. The Firemaster 6 stores 9 user-defined programs each with up to 9 segments, each comprising ramp-ramp-hold. Both controllers have a delay-on timer, full digital display and good error diagnostics.

L&L Top-Loading Kilns

In 2005 we became exclusive British Isles distributors for L&L of the USA.

L&L kilns are of exceptionally high quality, L&L being able to maintain these high standards whilst offering very competitive prices due to their large manufacturing operation and advantageous currency exchange rates.
